Dear Bill:

This is to verify your reception of WELM on 10.7.87. I will answer as many of your questions about our station as I can.

1. Frequency- 1410kc
2. Watts- 5,000 Day/Non-Dir. 1,000 Night/Dir. AM Stereo
3. Ant. Height- ?
4. Broadcast Hours- 24 hours
5. Coverage Area- Elmira, Horseheads, Corning, Watkins Glen, Sayre, PA Bath, Ithaca, Northern PA.
6. Studio/Xmitter- 1705 Lake Street
7. Network Affil.- CBS Radio 6a-10p/Mutual (Larry King) 11p-5a
8. Furthest Signal Report- Radio Operator in Richmond, VA
9. Our Format- Adult Contemporary
10. Many DX Letters- Infrequent but occasionally

Now you can help me with something. As a kid, and even to this day when I have time and energy, I listen to AM radio late night on a GE commercial receiver. It is pretty good even though I've had about 6 years use out of it. When I was younger, I just had various mediocre units. Although the GE Silver Anniversary Radio is good, I have often wondered about buying a more expensive unit. Becoming a ham radio operator is always something I've had an interest in also.

Since you are a member of the National Radio Club, would you mind sending me info on becoming a member? ALso, give me an idea of what kind of receivers are typically used by members and any info you might know about ham radio operators.

It was nice hearing from you and I look forward to your response back.

Sincerely,
